OBJECTIVE

Senior Python Developer with a Master's in Artificial Intelligence and over 6 years of experience driving technological innovation, process automation, and data optimization. Proven expertise in designing and deploying robust backend architectures, automated testing sequences, and AI-driven solutions. Highly skilled in leveraging Python to optimize databases and streamline complex workflows. Passionate about continuous improvement and delivering scalable software solutions that create immediate business impact.

EXPERIENCE

Estrateg IA | Ford Motor Company

2025 - 2026

Senior Python Developer

- **Architected and developed the "Ford Test AI Suite"** at Ford's Global Technology and Business Center (GTBC), an intelligent multi-agent platform designed to automate and streamline automotive component validation.
- **Engineered a natural-language chatbot using Python** that assists test engineers in generating structured Gherkin (BDD) test cases, significantly lowering the technical barrier for hardware testing.
- **Implemented a secure, cooperative team of specialized AI agents** operating behind the scenes to validate logic, component configurations, and physical interfaces.

Estrateg IA | Ford Motor Company

2024-2025

Validation Engineer

- Responsible for validating the technical specifications of upcoming Ford Motor Company vehicles at the component level, ensuring quality, functionality, and regulatory compliance.
- Designed and implemented over 10 automated sequences using specialized software and Python, optimizing processes and reducing testing time by up to 80%.
- Developed a Python-based tool to manage and compare data across multiple databases, enabling preventive analysis, early detection of inconsistencies, and significantly improving process accuracy and efficiency.

Independent Technology Consultant

2023 – 2024

- **Designed and deployed custom software solutions** for inventory management, control optimization, and point-of-sale (POS) registration, tailoring architectures to specific business requirements.
- **Managed end-to-end project lifecycles**, overseeing technical requirements gathering, system development, and successful delivery of digital tools for local businesses.
- **Provided comprehensive technical support and training** to client teams, ensuring high adoption rates, secure information handling, and increased operational efficiency.

Intel Corporation

2020-2023

Field Applications Engineer

- **Engineered software solutions in Python and C++** to drive product innovation for engineering prototypes and commercial hardware products across Latin America.
- **Provided specialized technical consulting** for enterprise-level IoT, Cloud, and Artificial Intelligence

projects, ensuring technical data compliance for high-value bids.

- **Optimized software architectures** in over 10 IoT implementations, significantly increasing processing speed and system accuracy while reducing overall deployment costs.
- **Led the technical execution for the launch of Intel's 13th Gen processors** in Mexico, developing custom software demonstrations and configuring over 15 complex systems for high-profile client presentations.
- **Acted as a Technical Evangelist**, organizing technical workshops and producing content in collaboration with ASUS and GIGABYTE, reaching over 100,000 views and driving technology adoption.

Instituto Politécnico Nacional

2019-2020

Technical Assistant (Social Service)

- **Developed AI algorithms and Python** programs applied to robotics, and managed SQL databases within the "Network of Experts in Robotics and Mechatronics" Laboratory.
- **Authored technical articles** for the Institute of Electrical and Electronics Engineers (IEEE) and mentored student teams for international robotics competitions.

EDUCATION

Universidad Internacional de la Rioja en México

2023-2025

Master in Artificial Intelligence (Titling process in progress)

Instituto Politécnico Nacional (UPIITA)

2015-2021

Bachelor of Science Bionic Engineering

Instituto Politécnico Nacional (CECyT 9)

2011-2014

Digital Systems Technician

SKILLS

- Programming Languages: Python, C++, SQL, HTML, Visual Basic, Assembly
- Frameworks & Libraries: FastAPI, Pandas, OpenCV, OpenVINO
- Tools & Technologies: Docker, Git, Supabase, MySQL, SolidWorks, MATLAB, ROS
- Languages: Spanish (Native), English (Intermediate)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Digital Project Management – MIU City University Miami (2025)
- IBM Data Science Professional Certificate – IBM (2023)
- Intel Edge Artificial Intelligence Certification – Intel Corporation (2022)
- Intel Technical Pro Cloud Technician Professional – Intel Corporation (2022)
- Certificate Program in Soft Skills and Leadership – Universidad Internacional de la Rioja
- Intermediate Distribution of OpenVINO Toolkit – Intel Corporation
